

Developer: Zisanda [Your Surname]

Project: YanderFlow

Week: 1 - Requirements & Planning Phase (29/09/2025 - 03/10/2025)

1. Achievements

- Reviewed client specification and identified key inconsistencies.
- Drafted and submitted the amendment list; received client approval.
- Created and finalized the Service Level Agreement.
- Defined user stories and mapped features into MVP vs later phases.
- Designed the ERD and outlined the system architecture.

2. Challenges

- Understanding professional SLA structure and tone.
- Balancing academic approach with professional client expectations.
- Adjusting the project timeline realistically to fit MVP scope.

3. Lessons Learned

- Clear client communication prevents future scope issues.
- A detailed SLA and ERD make technical planning smoother.
- Structuring week-by-week goals keeps development on track.

4. Next Steps (Week 2)

- Begin **Design & Prototyping**: wireframes + UI layouts.
- Establish the **frontend framework** in Visual Studio (React + TypeScript).
- Draft initial **API contract** (endpoint planning).
