

A. Research & Inspiration

Kanban:

- I like the layout of the Kanban board
- Drag and drop feature that Monday.com has for a task (for example, dragging from IN PROGRESS to DONE)
- There are four task statuses: DONE, IN PROGRESS, STUCK, NOT STARTED

Main Table:

Task	Owner	Status	Due date	Priority	Notes	Bu
Sweets		Working on it	Oct 9	Low	Action items	\$
Apples		Done	Oct 10	High	Meeting notes	\$
Chocolate		Stuck	Oct 11	Medium	Other	\$
+ Add task						

- I love the layout of the main table.
- The extra feature of being able to identify the priority level of each task.
- The notes feature is unnecessary. That one should stay in the Project Overview dashboard.
- Also, the extra row that shows the necessary overall results of certain columns is a nice feature.

Office ▾

Sidekick Integrate Automate Invite / 1

Main table ▾ Kanban +

New task ▾ Search Person Filter ▾ Sort Hide Group by ...

▼ To-Do

☐	Task	Notes	Budget	Files	Timeline ⓘ	Last updated	+
☐	Sweets	ion items	\$100		Oct 9 - 10	7 minutes a...	
☐	Apples	ting notes	\$1,000		✓ Oct 11 - 12	7 minutes a...	
☐	Chocolate	Other	\$500		Oct 13 - 14	7 minutes a...	
☐	+ Add task						
			\$1,600 sum	1 files	Oct 9 - 14		

Still on the main table:

- Files column is unnecessary in the main table. That will stay in the Project Overview dashboard.
- Lasty, Timeline and Last Updated columns? Wonderful. Keep them and the add column feature.

☐	+ Add task						
			\$0 sum	0 files			

Still on the main table:

- I am keeping the feature of showing the project statuses
- Statuses YanderFlow will have: TO-DO and COMPLETED

Dashboard and Reporting:

This will be the dashboard that will show everything. Exactly as it is.

B. Brand Personality

YanderFlow is a modern, creative, and reliable platform that empowers teams at Yander Acquisition to collaborate with confidence. With its visually calm and intuitive interface, YanderFlow makes it easy to see overall work, track progress, and communicate effortlessly. It's user-friendly, helping teams stay focused, connected, and productive, all in one place.

- YanderFlow's tone: Modern, Organized, Creative, Professional, and Fun

YanderFlow is modern in its design and mindset, built for the way teams work today. It's organized, helping people stay clear, structured, and in control of their workflow. With a creative touch, YanderFlow turns everyday collaboration into something visually engaging and inspiring. It remains professional, offering reliability and confidence for serious work. Yet, it never forgets to be fun, making teamwork enjoyable, intuitive, and full of small moments that keep users motivated.

- How YanderFlow's Personality Shapes Its Design
- **Rounded Corners → Friendly & Fun**
Rounded shapes feel inviting and approachable. They communicate that YanderFlow is not a rigid corporate tool, but a platform people enjoy using daily. This softness complements the “fun” side of your personality, approachable yet professional.
- **Calm Colors → Trust & Professionalism**
A palette of calm tones reinforces reliability and focus. It gives the interface a modern and organized feel while ensuring the workspace feels calm, not chaotic. This builds trust and support productivity.
- **Clear Fonts → Modern, Professional, and Fun**
Clean, readable typography shows clarity and care. It reflects professionalism and structure, while rounded or slightly playful letterforms hint at creativity and fun, a balance between precision and personality.
- **Soft Animations → Approachable & Creative**
Subtle motion (gentle fades, slides, or hover effects) gives YanderFlow life without distraction. It expresses creativity and approachability, showing users that the system is alive, intuitive, and enjoyable to interact with.

C. Fonts

Heading font: Poppins

Body font: Inter

E. Design Direction Notes

YanderFlow is a project and design management web application developed for Yander Acquisition. Its design identity blends professional structure with creative warmth, ensuring that users experience both reliability and inspiration while managing creative projects. The interface should feel clean, intuitive, and inviting, much like a calm workspace that encourages productivity and collaboration.

YanderFlow's personality is modern, organized, creative, fun, and professional. It represents a perfect balance between structure and imagination, reflecting Yander Acquisition's reliability while capturing the dynamic energy of creative collaboration.

YanderFlow should feel like a smart, approachable teammate, one who keeps projects on track while inspiring creativity.

➤ **Core traits and their design influence:**

- Modern: clean layouts, bold typography, forward-looking interface.
- Organized: clear hierarchy, consistent spacing, and logical flow.
- Creative: soft accent colors and glass-like effects to inspire users.
- Fun: friendly micro-interactions, subtle motion, and approachable tone.
- Professional: neutral foundation, strong readability, polished visuals.

Slogan: *Organized Minds With Creative Flow.*

This slogan encapsulates YanderFlow's mission - bringing structure to creativity and creativity to structure.

➤ **Typography**

Font Pairing:

- Headings: *Poppins* – geometric, confident, creative
- Body Text: *Inter* – clean, legible, modern

Font weights:

- Headings – 600 (SemiBold)
- Body – 400 (Normal)
- Emphasis – 500 (Medium)

Typography should maintain strong readability with generous spacing, clear hierarchy, and limited decorative styling.

➤ **Layout & Components**

- Grid System: clean 12-column responsive grid.
- Corners: medium-rounded (8 – 12 px) for friendliness.
- Cards & Panels: subtle elevation with soft shadows.
- Navigation: left-aligned sidebar with top utility bar (Monday-style).
- Dashboards: widget-based with drag-and-drop functionality.
- Icons: minimal outline icons with uniform stroke width.

Consistency is key - similar card heights, predictable button placements, and well-balanced white space.

➤ **Interaction & Motion**

- **Animations:**
Soft, subtle transitions on hover, loading, and modal opening - enough to feel alive but not distracting.
- **Hover States:**
Slight elevation or glow for buttons and cards, maintaining accessibility and clarity.
- **Feedback:**
Real-time updates (SignalR) and light animations communicate responsiveness and energy.

➤ **Visual Hierarchy**

- Strong Top Bar for navigation or project overview.
- Left Sidebar for modules (Projects, Tasks, Designs, Feedback).
- Center Workspace for detailed dashboards and active tasks.
- Right Panels or Overlays for notifications, comments, or activity feeds.

➤ **Iconography & Imagery**

- Icons: Simple line icons with consistent stroke width.
- Imagery: Minimal illustrations or background shapes that complement the glass aesthetic - soft gradients or transparent overlays.

➤ **Overall**

YanderFlow's design goal is to create a seamless blend of structure and creativity, a space where organized minds and creative energy can coexist. It should look trustworthy enough for business use and inspiring enough for designers to love working in.
