The image shows a login form for 'YanderFlow'. The form is centered on a blue gradient background. It has a white rounded rectangle containing the text 'WELCOME BACK!' and 'Organized Minds With Creative Flow.'. Below this are two input fields: 'Email' and 'Password', each with a placeholder 'Text here'. There are two links: 'Forgot Password' and 'Create Account'. At the bottom is a blue 'LOGIN' button.

User Stories

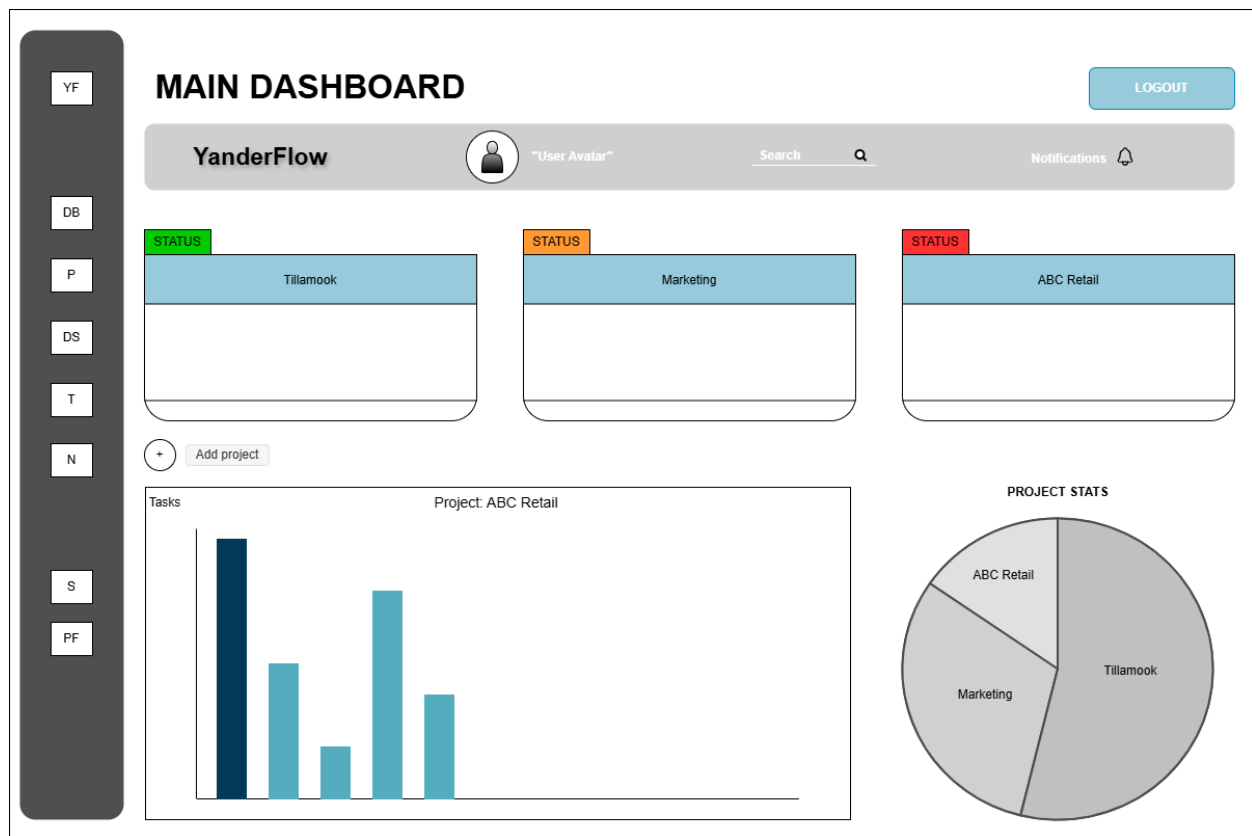

- As a user, I want secure login with role-based permissions so that I only see information relevant to me.
- As a user, I want to reset my password via email recovery so that I can regain access if I forget my credentials.

Acceptance Criteria

- Users can enter email + password to log in.
- Incorrect credentials show an error message.
- "Forgot Password" opens recovery form → sends reset link to registered email.
- After login, users are routed to their role-based Dashboard (Creative, Designer, Client, Admin).

Dashboard – Main Workspace:

Login → Dashboard

User Stories

- As a creative, I want to see all ongoing projects in a visual board so that I can track status.
- As a client, I want to see project progress immediately so that I know where things stand.
- As a creative, I want to see upcoming deadlines and project health on a dashboard so that I can prioritize tasks.
- As an admin, I want to assign users to projects so that access is properly controlled.

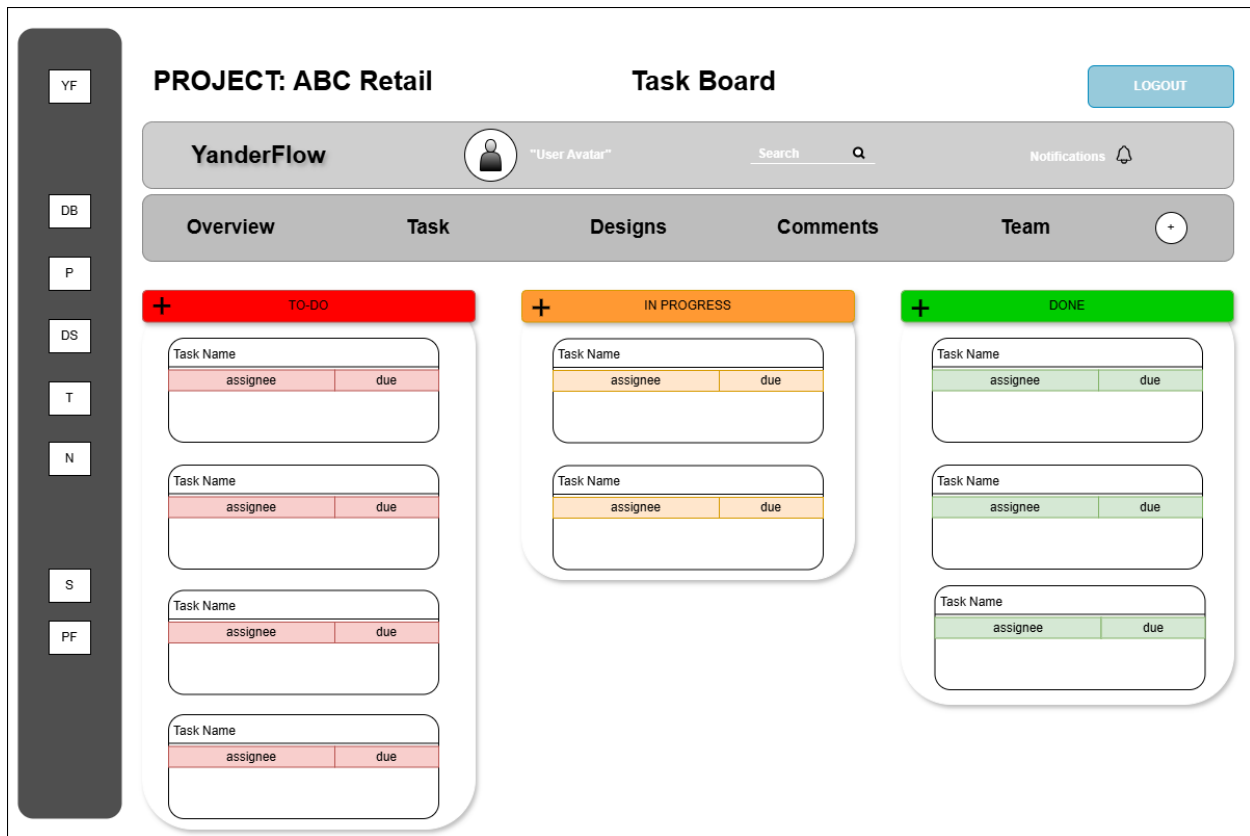

Acceptance Criteria

- Dashboard shows a grid of Project Cards displaying title, status, due date, and owner.

- Sidebar navigation lists “Dashboard / Projects / Designs / Tasks / Notifications / Settings.”
- Quick-stats panel summarizes upcoming deadlines and overall progress.
- “Create Project” button opens new-project brief form (for Creatives / Admins only).
- Selecting a Project Card opens the **Project Detail** screen.

Project Detail – Tasks:

Dashboard project card → Project Detail (Tasks)

User Stories

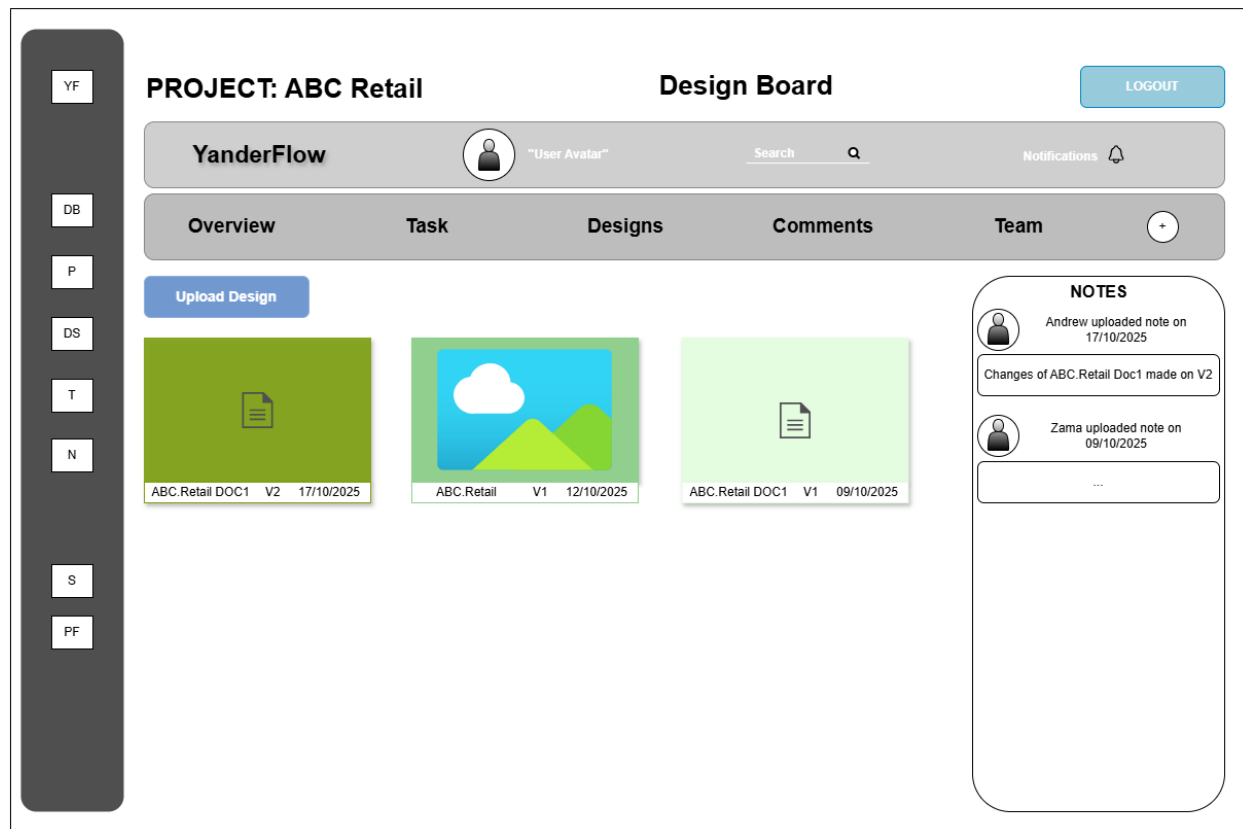

- As a creative, I want to create a project brief so that I can define project requirements.
- As a creative, I want to add objectives, deadlines, and style preferences so that the Designer understands expectations.
- As a creative, I want to attach reference files so that Designers and Clients have context.
- As a designer, I want to update task status (“To Do,” “In Progress,” “Done”) so that the team knows my progress.
- As a client, I want to see project deadlines so that I know when deliverables are expected.

Acceptance Criteria

- Header shows project title, status chip, deadline, and owner.
- Tabs: **Tasks | Designs** (default = Tasks).
- Kanban-style board with columns “To Do / In Progress / Done.”
- Each Task Card displays title, assignee, due date, priority.
- “Add Task” creates new task form.
- Drag-and-drop between columns updates task status.

Project Detail (Designs) thumbnail → Design Review

User Stories

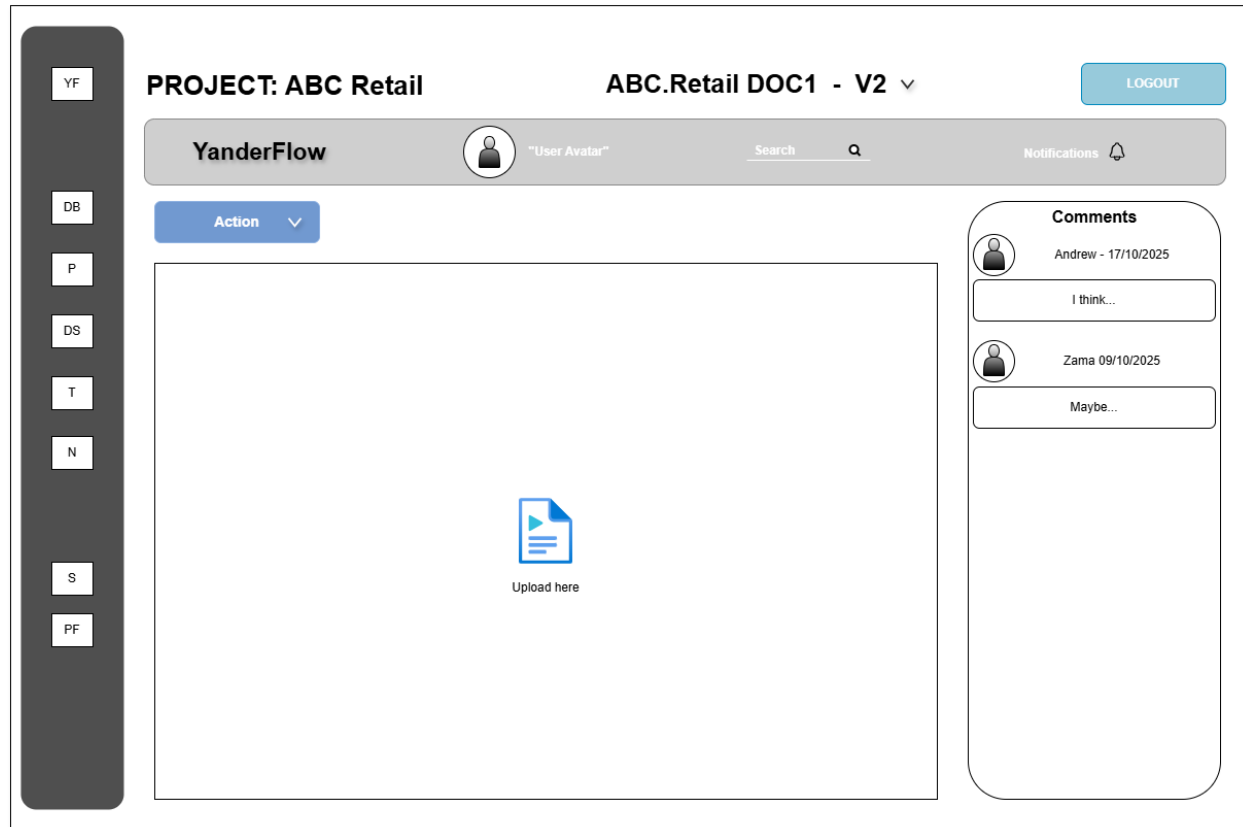

- As a designer, I want to upload design files so that the Creative and Client can review them.
- As a designer, I want to upload multiple versions of a design so that Clients can track changes.
- As a creative, I want to see which version of a design is current so that I know we're using the latest file.

Acceptance Criteria

- Tab displays design thumbnails with version number and comment count.
- "Upload Design" button opens file-upload dialog (Designer role only).
- Latest version is visually highlighted.
- Selecting a design opens **Design Review** screen.

- Admin / Creative can tag designs as “Approved,” “Pending,” or “Needs Changes.”

Design Review Page: <https://drive.google.com/file/d/1fDzZRAjMqX-s2Vd6LKMmcYf8AhXRIO69/view?usp=sharing>

User Stories

- As a client, I want to view and approve designs so that projects can move forward.
- As a client, I want to leave comments directly on a design so that feedback is specific and clear.
- As a creative, I want to receive notifications when a Client requests changes so that I can coordinate with the Designer.
- As a designer, I want to respond to feedback within the app so that communication stays in one place.

Acceptance Criteria

- Large design preview area with version selector.
- Comment rail (right side) showing threaded comments by role (Designer / Client / Creative).
- Approve and Request Changes buttons (visible to Clients only).

- Inline annotations show comment markers on preview.
- Saving a comment triggers in-app notification to assignees + email alert via backend.

User Stories

- As a user, I want to update my profile and password so that my information is current and secure.
- As a user, I should be able to receive notifications so that I stay informed about project activity.

Acceptance Criteria

- Profile section displays Name, Email (Editable).
- Password fields for change + confirmation.
- Notification preferences (toggle for email updates).
- “Save Changes” button confirms update and shows success toast.
